

VIVOS

The new collaborative and immersive tool
for visualizing structures and sites

Create and share your own immersive visits

VIVOA is a web-based solution that allows anyone to create an immersive visits from a simple video recording, annotate the visit content, share it and keep a digital archive.

Whether you're a project owner, architect, design firm or construction company, VIVOA allows you to virtually tour your assets and projects from the comfort of your office without having to go in person.

View your assets in 360°, anywhere, anytime

Reduce on-site travel, limit carbon footprint and save money.

Simplicity

A video sequence from a consumer 360° camera is enough to quickly capture the structure and its surroundings. Our algorithms do the rest, transforming the video into an immersive visit.

Temporal tracking

Go back in time and follow the evolution of the life of your projects. Multi-date comparisons between visits synchronize views with a single click.

Autonomy

Now anyone can document assets or projects just long enough to go through the structure or take a tour of the site.

Effective collaboration

Share your visits and collaborate in an immersive, rich, and intuitive support. Whether it's for structure inventory or monitoring, site preparation or supervision, it's up to you how you use VIVOA!
